Effect of a quadrivalent prophylactic human papillomavirus (types 6, 11, 16, and 18) L1 virus-like-particle vaccine on risk of cervical intraepithelial neoplasia grade 2, grade 3, and adenocarcinoma in a combined analysis of four randomized clinical trials: The Future II Study Group. *Lancet Oncol*. 2007; 8: 1045-52. 5. Effect of a quadrivalent prophylactic human papillomavirus (types 6, 11, 16, and 18) L1 virus-like-particle vaccine against high-grade vulvar and vaginal lesions in a combined analysis of three randomized clinical trials: EVIDENCE V015, Study 3016, Study 3017, Study 3018. *Journal of Clinical Oncology*. 2009; 27: 593-99.

The following are selections from the Prescribing Information. Before administering GARDASIL®, please consult the full Prescribing Information.

#### Indications

**GARDASIL®** is a recombinant, quadrivalent vaccine that protects against human Papillomavirus (HPV) types 6, 11, 16, and 18.

#### Indications

**GARDASIL®** is indicated in females aged 9 through 45 years for the prevention of cervical, vaginal and vaginal cancer, precancerous or dysplastic lesions, genital warts, and intraepithelial neoplasia of the cervix. Efficacy data for the prevention of human Papillomavirus (HPV) types 6, 11, 16 and 18 are not included in the research.

#### Range of administration

**GARDASIL®** should be administered intramuscularly as 3 separate 0.5-mL doses according to the following schedule:

First dose at month 0, second dose 2 months after first dose, and third dose 6 months after the first dose.

Individuals are encouraged to get their 11, 16, and 18 HPV vaccine (cervarix) whenever it is available. Cervarix offers the best demonstrated protection for those who have received all 3 doses within a year period. It is acceptable to receive the 11, 16, and 18 HPV vaccine and the 6, 11, 16, and 18 HPV vaccine at the same time or sequentially at least 1 month apart. The 6, 11, 16, and 18 HPV vaccine should be administered first 1 month after the second dose.

#### Contraindications

Contraindications to the active substances or to any of the excipients of the vaccine.

Individuals who develop symptoms indicative of hypersensitivity after receiving a dose of **GARDASIL®** should not receive further doses of **GARDASIL®**.

#### Precautions

All live vaccine, reactants with **GARDASIL®** may not

include live bacterial or viral vaccines recently.

This vaccine is not intended to be used for treatment of genital warts, genital herpes, cancer, or genital lesions. It is not intended to be used for the treatment of genital warts, genital herpes, cancer, or genital lesions. It is not intended to be used for the treatment of genital warts, genital herpes, cancer, or genital lesions.

It is not intended to be used for the treatment of genital warts, genital herpes, cancer, or genital lesions.

It is not intended to be used for the treatment of genital warts, genital herpes, cancer, or genital lesions.

# INDIA'S LARGEST CHAIN OF FERTILITY CLINICS CELEBRATES A NEW MILESTONE.

Celebrating  
**5000**  
**IVF**  
PREGNANCIES  
& COUNTING

With your help and support, Nova IVI Fertility has achieved a landmark of 5,000 IVF pregnancies in just 39 months. We performed 12,024 cycles with a success rate of 42%. With advanced technology from IVI, Spain and world-class expertise, we will continue to spread smiles across India and the world.

## 5 KEYS THAT PAINTED 5K SMILES

- Partnership with IVI, Spain: World leaders in Assisted Reproductive Technology (A.R.T.).
- Clinical Expertise: Internationally acclaimed and experienced team of doctors, ensuring a patient-centric approach.
- Skilled Embryologists: Highly trained team of in-house embryologists ensuring high quality lab services.
- Cutting-edge Technology: Latest techniques and technologies, ensuring a high success rate.
- Trust: Of our patients, referring doctors and consultants which has led to this achievement.
