Increase the spontaneous pregnancies in your patients...

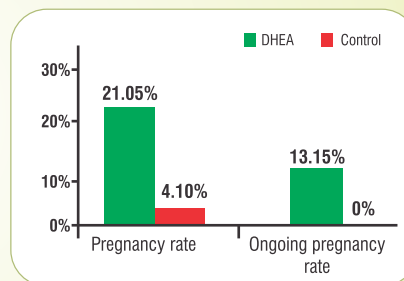

**OVARES**

(Micronized DHEA 25mg + Folic Acid 1.5mg)

Betters the odds of achieving pregnancy

- Positively affects spontaneous pregnancies in women with diminished ovarian function¹
- Revert deteriorating older oocytes into younger oocytes acting at early stages of follicle maturation¹
- Significantly increases ovarian function both in poor responders & women above 40¹

“The high percentage of spontaneous pregnancies before starting IVF cycle suggest that DHEA alone can raise fertility in women with poor prognosis for pregnancy, independently of age, probably adjusting defect at earlier stages of folliculogenesis.”¹
